

OUR ENVIRONMENTAL AND SUSTAINABILITY POLICY

At Cenergo LLC, we consider a respectful and responsible approach to the environment and to people as one of our core priorities. Across all areas where we operate, we implement innovative and continuously evolving strategies to meet the needs and expectations outlined in this policy. We act with the awareness that a livable environment is not merely a legacy inherited from our ancestors, but a trust we must pass on to future generations.

To achieve these objectives, we commit to implementing the following principles:

- Conducting our operations in full compliance with all applicable national and international environmental laws, regulations, standards, and principles;
- Striving to achieve a zero environmental incident target;
- Using natural and energy resources efficiently and economically;
- Taking all necessary measures to ensure the protection and sustainability of biodiversity and natural ecosystems;
- Identifying and addressing all potential risks to the environment and human health in advance;
- Ensuring the proper segregation, storage, and transportation of waste;
- Promoting recycling and reuse practices across all operations;
- Fostering an active and effective culture of environmental awareness and sustainability throughout the organization;
- Addressing the impacts of climate change and greenhouse gas emissions by controlling and minimizing emissions, while enhancing positive environmental contributions;
- Preventing air, water, and soil pollution;
- Identifying and assessing risks and opportunities related to environmental and sustainability issues;
- Raising awareness of environmental and sustainability matters among our employees, stakeholders, subcontractors, and solution partners;
- Sharing our environmental and sustainability performance transparently with all relevant authorities and stakeholders;
- Closely monitoring innovations and developments, and identifying the needs required to integrate best practices into our projects and operations;
